Summer Assignment

Our studies of Human Geography will take us around the world. In order to better understand our studies along the way, it's imperative you are familiar with locations of countries currently found around the world. While there will be map quizzes throughout the year, this class is *much more* than the memorization of place names or regions.

DIRECTIONS: Identify (label) the countries/territories listed on the attached maps. A complete list of countries and maps have been included. Label neatly, as you will be referencing these maps throughout the year. Small or peripheral political units may have to be drawn in.

Map quizzes will be given throughout the school year. The first map quiz will address the countries of North America. This quiz will take place the first week of school. There are many websites you can use to practice for map quizzes. The following website has been used by students in previous years and is a handy resource. http://www.ilike2learn.com/
